

Presenting the Same Material

Thousands of schools use this platform to explore careers and more, so there are always educators looking for new learning opportunities for their students.

There are three main ways to reuse your presentation material:

1. Re-present content you prepared for a previous session to another class. Be sure to address the current educators requested key points.
2. Reuse your material from a previous session and share through an Industry Chat. Decide which key points you would like to discuss, then select the "[Offer an Industry Chat](#)" button on the Dashboard. Fill out the submission form, including picking your preferred date, time, and audience grade levels for the session. This offer will be shared with our large network of educators! **Note:** Industry Chats are webinar mode and have the ability of reaching several classrooms across the platform at one time.
3. Lead the same Industry Chat on multiple occasions. Log in and use the navigation bar to the left to click on "**Sessions**", "**My Sessions**", followed by selecting the "**Completed**" tab. Then, locate the chat you would like to reuse and select the "**Use as template**" option to quickly re-create the Industry Chat you have already led. Update any time and date changes you would like to make and submit your chat offer.

Mathematical Majors and Mysterious Math Magic Industry Chat

Do you know the top industries that employ people who have degrees in math? Or that math is foundational to many careers with computers? April is National Math & Statistics Month and are kicking it off with some help from our magical math...

 Confirmed for: 04/04/2022, 12:00 PM EDT

 By Jennifer Langdon
